-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

^ (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 1, 2, 4, 6, 7 and 19-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over MacLeod et al. (4,875,318) in view of Craw et al. (6,203,423). MacLeod et al. discloses all of the limitations of the claim(s) except for a pivotal flap mounted to the second member. Craw et al. discloses the presence of a pivotal flap mounted to the second member. See **34** and **24**. Hence, one skilled in the art would find it obvious to modify the system of MacLeod et al. to include the pivotal flap mounted to the second member of Craw et al. for the purpose of debris control. See MacLeod et al. **15** for the first member and **17** for the second member. Regarding claim 4, see **23** and **24**. Regarding claim 6, see **13d**. Regarding claim 7, see **17d**. Regarding claim 19, see **15d** for the mounting flange, **17** for the rotatable sleeve member, **33** for the lint grill, **24** for the flap plate frame, and **34** for the pivotal flap. Regarding claim 21, see **40** and **41**. Regarding claim 23, see col. 3, lines 16-20.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over MacLeod et al. in view of Craw et al. It is well-known in the art of HVAC to design a connection means by employing threads. Thus, it would have been obvious to one of ordinary skill in the art to incorporate the features of a threaded connection means into the system of MacLeod et al. in view of Craw et al. for the purpose of a tight seal.

Art Unit: 3749

Regarding claim 24, it has been held that the term "integral" is sufficiently broad to embrace constructions united by such means as fastening and welding. *In re Hotte*, 177 USPQ 326, 328 (CCPA 1973).

Allowable Subject Matter

Claims 25-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The provided references are representative of the state of the art that is applicable to the applicant's invention. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Derek S. Boles at (571) 272-4872 or supervisory patent examiner Ehud Gartenberg at (571) 272-4828.
